## ATTACHMENT B

### Marked Up Replacement Paragraphs

*At the following locations, a marked up copy of the replaced paragraph is provided.*

*Page 8, lines 18-26.*

WI The probe comprises a cylindrical section and tip and, preferably, incorporates a filter (not shown), more preferably a filter having a movable filter section as more particularly described in the Applicant's ~~co-pending application filed concurrently herewith and bearing attorney reference IK/20664~~ filed application Serial No. (attorney docket no. P07239US00), the entire disclosure of which is incorporated herein by reference. Such a movable filter section causes movement of the effective filtering portion over time, thus reducing the possibility of clogging. As shown, schematically in Fig. 3, a motor drive unit may be provided on the base unit for driving the moving filter assembly.
